01

Brand overview

Laluan Kitani means “our route” in Brunei Malay. It is a community navigation app for drivers in Brunei Darussalam, built around how Brunei actually works: school-run peaks, floods and the local place names people really use, and improved every day by Bruneian drivers’ own reports.

Element	Malay	English
Name	Laluan Kitani	“our route”
Main tagline	**Tejem? Tani elak.**	Jammed? We avoid it.
Companion line	—	**Jammed? We dodge it.**
App store subtitle	Navigasi komuniti Brunei	Brunei’s community navigation

- Always write the name as two words, both capitalised: **Laluan Kitani**. In the lockup, “Laluan” is `ink` and “Kitani” is `teal-text`.
- Always spell the tagline **“Tejem”**, never “Tejam” or “Tejem!”. It ends with a full stop: *Tejem? Tani elak.*
- Lead with the Malay tagline; the English companion line may follow beneath it, never replace it in local campaigns.
- Never use the Brunei flag or national crest anywhere in the brand, its marketing or the app.

Using these tokens

- Backgrounds `surface` (off-white / charcoal), cards `surface-raised`, text `ink` and `ink-muted`.
- Actions and the route line are `primary`, with labels in `on-primary` (off-white in light mode, charcoal in dark mode, because white on `bright-teal` is only 2.4:1).
- Teal words on a page use `teal-text`; highlights use `highlight` (light-mint) with charcoal text; warm moments use `friendly` (warm-sand) with charcoal text.
- Keyboard focus: a solid 2 px `focus-ring` outside a 2 px `surface` gap.
- `report-*` and `peak-zone` exist for the map only.
- `surface-raised`, `ink-muted` and `hairline` are supporting neutrals added to make the interface work; they are not part of the core seven-colour palette.

02

Personality and voice

Guiding rule: calm while driving, warm when parked.

Trait	What it sounds like	What it never sounds like
Local friend	Uses the place names Bruneians use	A foreign app translating street signs
Calm	“Flood ahead. Rerouting.”	“Watch out!! Flood!!”
Honest	“Reported 20 min ago. Still there?”	Guessing, overpromising arrival times
Respectful	“Closed for Friday prayers.”	Jokes about prayer times, officials or other drivers
Community-minded	“Thanks to 3 drivers who reported this.”	Blaming or ranking drivers

Language

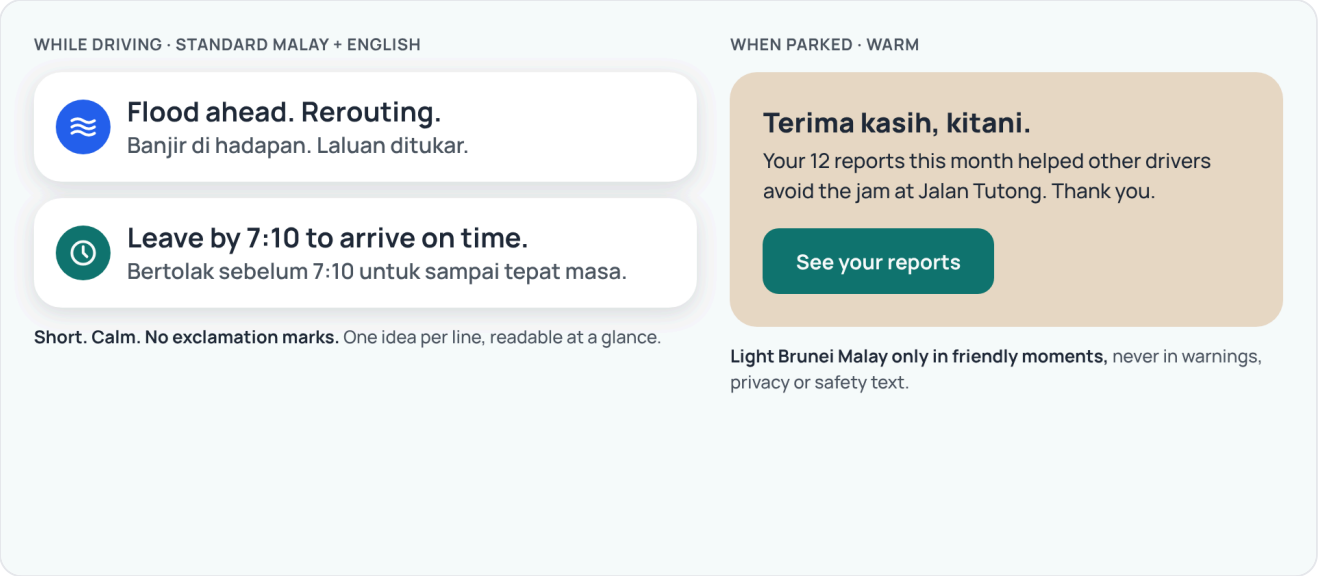

- Malay and English carry equal weight. Show both where space allows; otherwise follow the user’s app language.
- Warnings, privacy and safety text use **standard Malay** (Bahasa Melayu baku).
- Light **Brunei Malay** (*kitani*, *tani*, *tejem*) appears only in friendly, parked moments and marketing, never in safety warnings.

While driving

- No exclamation marks.
- Short sentences, readable at a glance: one idea per line, ideally under six words.
- Lead with the fact, then the action.

English	Malay
Flood ahead. Rerouting.	Banjir di hadapan. Laluan ditukar.
Leave by 7:10 to arrive on time.	Bertolak sebelum 7:10 untuk sampai tepat masa.

See the **DriveAlert** preview for both registers side by side.

CALM WHILE DRIVING, WARM WHEN PARKED

03

Logo

The symbol is a slanted, stylised letter **K** made of road shapes, with a dashed lane line running along its main diagonal road: **K for Kitani**.

Version	Artwork	Use
Light	Off-white K on a teal-green rounded square	Default app icon, stores, light backgrounds
Dark	Bright-teal K on a charcoal rounded square	Dark-mode icon, dark backgrounds

Formats

- **App icon** (light and dark): see **AppIcon**.
- **Horizontal lockup**: symbol + “Laluan Kitani” in Manrope Bold, “Laluan” in `ink` (charcoal), “Kitani” in `teal-text` (teal). See **Lockups**.
- **Stacked lockup**: symbol centred above the name.
- **Symbol alone**: when the name is already visible.

Clear space and minimum size

- Clear space: at least ¼ **of the symbol’s height** on every side (see **ClearSpace**).
- Minimum size: symbol **24 px** tall; horizontal lockup **120 px** wide.

Don’ts

No stretching, no extra rotation, no colours outside the palette, no shadows, glows, outlines, gradients or 3D, no busy photo backgrounds, no font changes, and no altering the lane dashes. See **LogoDonts**.

Asset files

- `logo-light-original.jpg` , `logo-dark-original.jpg` : the supplied masters, untouched.
- `app-icon-light.png` , `app-icon-dark.png` : the masters with transparent corners.
- `symbol-teal.png` , `symbol-bright-teal.png` , `symbol-offwhite.png` , `symbol-charcoal.png` : the K alone, cut from the light master and filled with exact palette colours.

The masters are 1024 px JPEGs whose colours sit close to, but not exactly on, the palette (the light tile samples about #0F7567 and the dark K about #1AAEA0). The two masters also differ in their lane dashes: the dark version has a dash on the lower leg that the light version does not. Confirm which is correct and commission a vector (SVG) master before print or large-format use.

Light · off-white K on teal-green

Default icon, light mode and stores

Dark · bright-teal K on charcoal

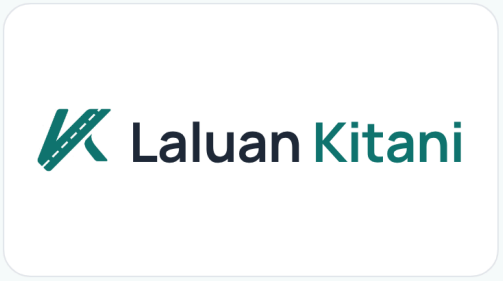

Dark-mode / tinted icon variant

64 · 40 · 24 px

24 px is the smallest the symbol may appear

APP ICONS, LIGHT AND DARK, WITH MINIMUM SIZE

Horizontal lockup

Manrope Bold · “Laluan” in ink, “Kitani” in teal-text

Stacked lockup

Square spaces, splash screen

Symbol alone

When the name is already visible

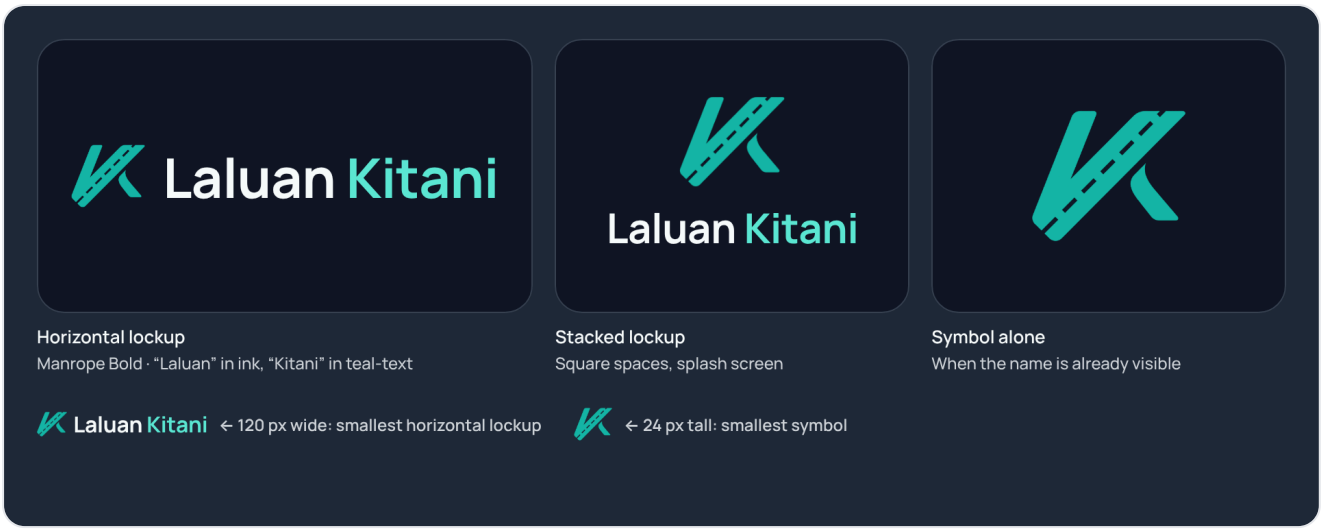

← 120 px wide: smallest horizontal lockup

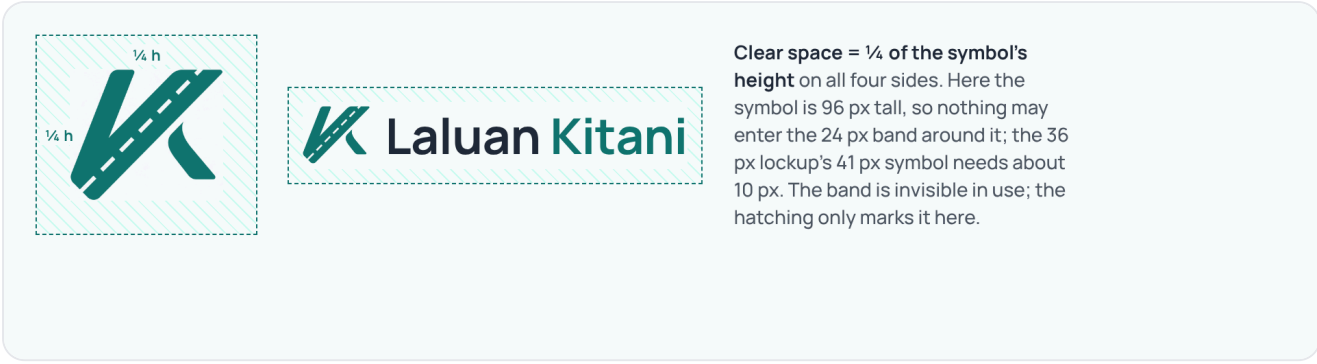

← 24 px tall: smallest symbol

LOCKUPS ON LIGHT

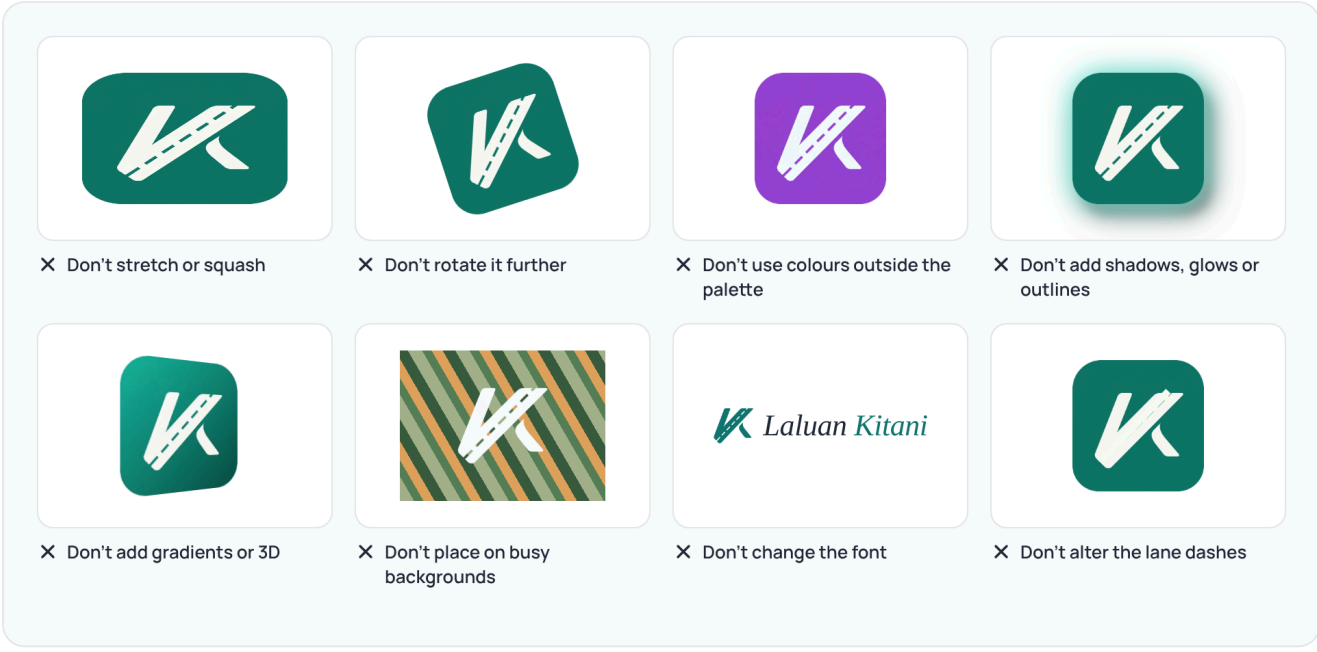

LOCKUPS ON DARK

Clear space = ¼ of the symbol's height on all four sides. Here the symbol is 96 px tall, so nothing may enter the 24 px band around it; the 36 px lockup's 41 px symbol needs about 10 px. The band is invisible in use; the hatching only marks it here.

CLEAR SPACE

LOGO DON'TS

04

Colour palette

Swatch	Token	Hex	Use
Primary teal-green	teal-green	#0F766E	Buttons, route line, logo
Primary light mint	light-mint	#CCFBF1	Highlights, backgrounds
Neutral dark charcoal	charcoal	#1F2937	Text, dark-mode surfaces
Neutral light off-white	off-white	#F9FAFB	Light-mode background
Accent warm sand	warm-sand	#E7D8C3	Friendly moments, sponsored cards
Dark-mode bright teal	bright-teal	#14B8A6	Buttons, route, logo on dark backgrounds
Dark-mode light teal	light-teal	#5EEAD4	Teal text on dark backgrounds

Reserved for map warnings

These colours belong to drivers' reports. The brand never uses them: not in buttons, illustrations, marketing or the logo.

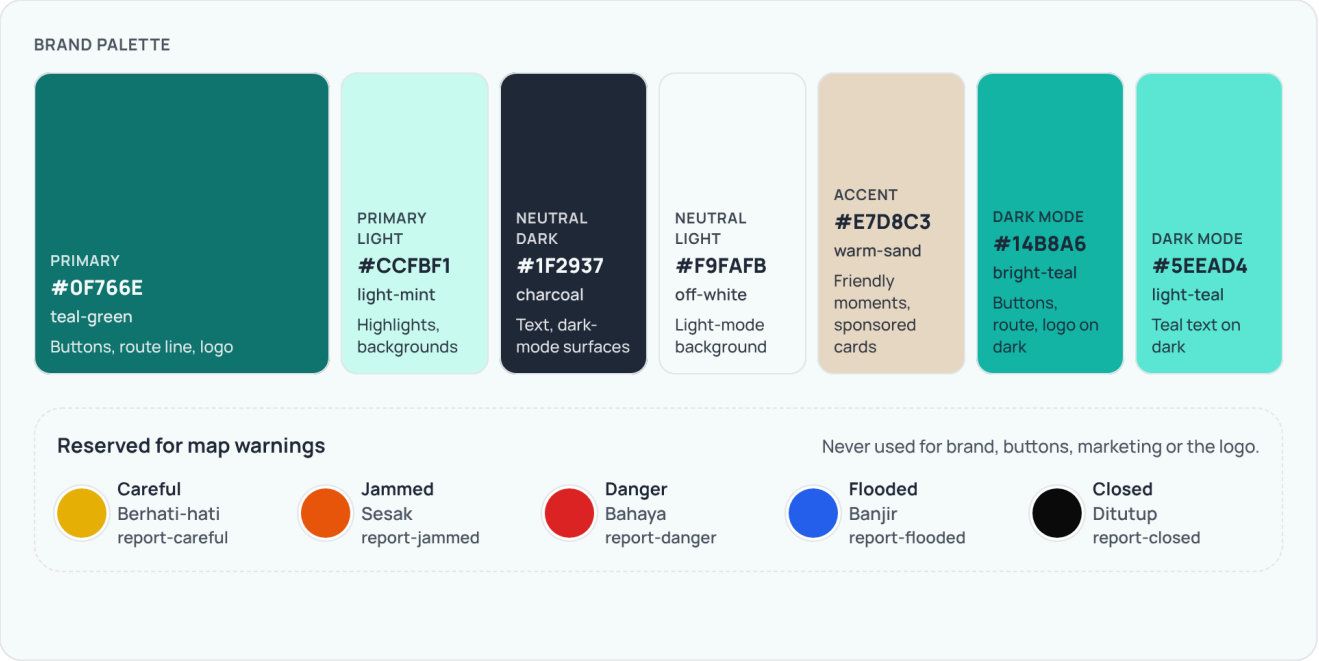

Report	Token	Hex	Icon colour
Careful / Berhati-hati	report-careful	#EAB308	charcoal
Jammed / Sesak	report-jammed	#EA580C	white
Danger / Bahaya	report-danger	#DC2626	white
Flooded / Banjir	report-flooded	#2563EB	white
Closed / Ditutup	report-closed	#0A0A0A	white

The brief named these colours but not their exact values; the hex codes above are proposals chosen so each white icon holds at least 3:1 against its fill (Careful uses a charcoal icon instead). Approve or replace them before development.

Contrast (WCAG 2)

Pair	Ratio	Verdict
Off-white on teal-green	5.2:1	Text OK
Charcoal on off-white	14.1:1	Text OK
Teal-green on off-white	5.2:1	Text OK
Bright-teal on charcoal	5.9:1	Text OK
Light-teal on charcoal	9.9:1	Text OK
Charcoal on warm-sand	10.5:1	Text OK
Teal-green on warm-sand	3.9:1	Large text only
White on bright-teal	2.4:1	Fails: use charcoal labels
Teal-green vs report-flooded	1.1:1	Same lightness: never rely on hue to tell route from flood

Ratios are computed with the WCAG 2 relative-luminance formula from the hex values above.

BRAND PALETTE AND RESERVED MAP-WARNING COLOURS

05

Typography

Manrope (Google Fonts, SIL Open Font Licence) for everything: interface, marketing and the lockup. Load weights 400–800.

Style	Size / line	Weight	Use
`display`	48 / 52	800	Campaign headlines
`h1`	32 / 40	800	Screen titles when parked
`h2`	24 / 32	700	Section titles
`h3`	18 / 26	700	Card titles
`body-lg`	18 / 28	500	Lead text
`body`	16 / 24	500	Default text
`small`	14 / 20	500	Metadata
`caption`	12 / 16	700	Labels
`turn-distance`	40 / 44	800	Distance to next turn
`turn-street`	24 / 30	800	Bold turn instruction
`drive-alert`	20 / 26	700	Driving alerts
`eta`	16 / 22	700	Arrival summary

- The brief fixes the typeface; the sizes above are the proposed scale.
- Turn instructions set the street name in `turn-street` and let long names such as **Jalan Pengiran Babu Raja** wrap onto two lines. Never truncate a street name.
- See **TypeScale** for the full scale and a turn banner.

display 48px/52px 800	**Tejem? Tani elak.**
h1 32px/40px 800	**Laluan Kitani**
h2 24px/32px 700	**Tempat disimpan · Saved places**
h3 18px/26px 700	**Kongsi perjalanan · Share trip**
body 16px/24px 500	A navigation app built around how Brunei actually works: school-run peaks, floods and the place names we really use.
small 14px/20px 500	Reported 4 min ago · Pelapor dipercayai
caption 12px/16px 700	PEAK SPOT · 7:00–7:45

TYPE SCALE AND TURN INSTRUCTION

06

Iconography

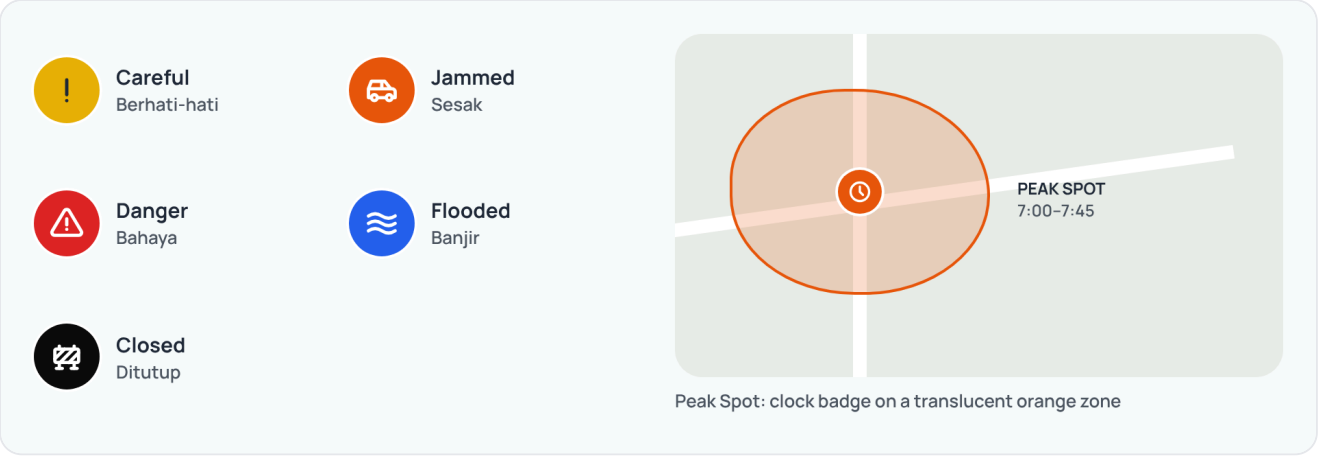

One outline set only: **Tabler Icons** (outline), 24 px grid, 2 px stroke, rounded ends and corners. Icons inherit `currentColor`. See **IconSet**.

Report-label badges

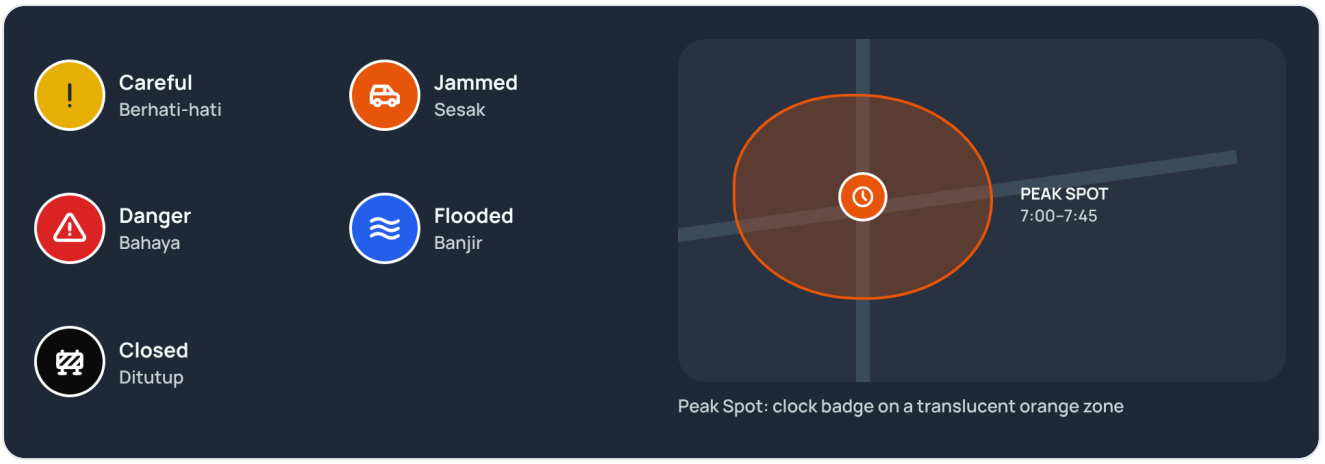

White icon on a solid coloured circle with a 2 px white ring; each report has its own distinct shape so meaning never depends on colour alone. See **ReportBadge**.

Report	Shape	Colour
Careful	Exclamation mark	Yellow (charcoal icon for legibility)
Jammed	Car / traffic queue	Orange
Danger	Warning triangle	Red
Flooded	Water waves	Blue
Closed	Road barrier	Black
Peak Spot	Clock	Orange badge on an orange map zone

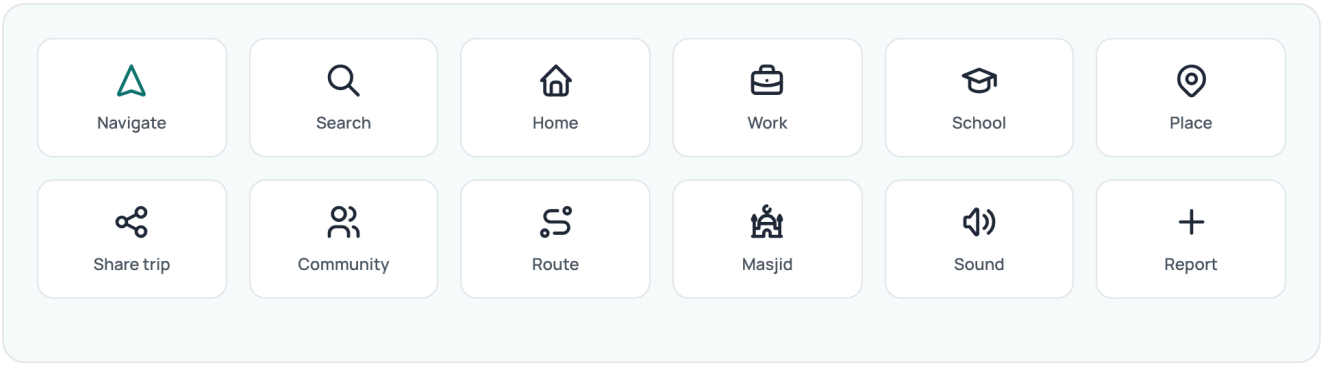

- Careful breaks the white-icon rule on purpose: white on yellow measures 1.9:1, below the 3:1 needed for a meaningful icon.

REPORT BADGES AND PEAK SPOT, LIGHT MAP

REPORT BADGES, DARK MAP

TABLER ICONS OUTLINE SET

07

Feature names

Use these names exactly, in both languages. Capitalise only the first word.

English	Malay
Peak Spot	Peak Spot
Report	Lapor
Leave by	Bertolak sebelum
Careful	Berhati-hati
Jammed	Sesak
Danger	Bahaya
Flooded	Banjir
Closed	Ditutup
Still there?	Masih ada?
Share trip	Kongsi perjalanan
Share live location	Kongsi lokasi langsung
Saved places	Tempat disimpan
Closed for Friday prayers	Tutup untuk solat Jumaat
Trusted reporter	Pelapor dipercayai

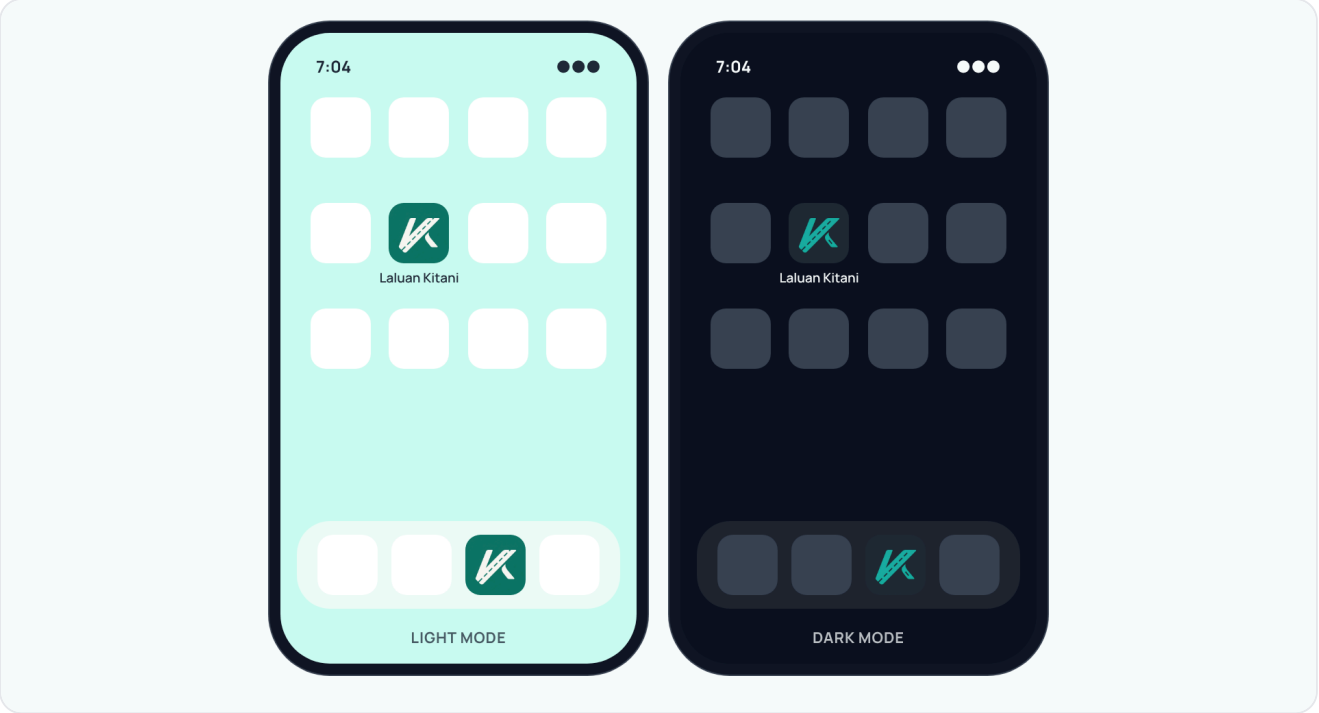

- “Peak Spot” stays in English in both languages.

08

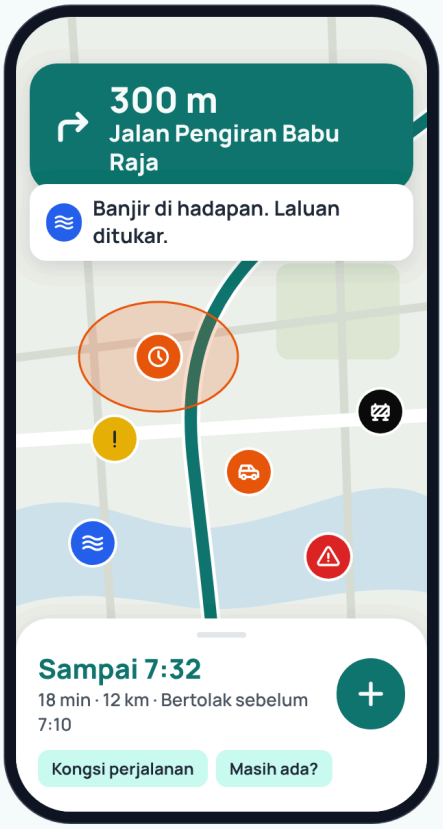

Application examples

- **HomeScreen**: the light and dark app icons on a phone home screen.
- **MapScreen**: a driving screen with the teal route line, report badges, a Peak Spot zone, a turn banner for Jalan Pengiran Babu Raja and a calm bilingual alert.
- **SocialPost**: a square post led by **Tejem? Tani elak.**

Across every application: teal and neutrals carry the brand, report colours carry only the map's warnings, and the Brunei flag and crest never appear.
